

Get more from Android with the **Wordpad 7**

Wordpad 7 is a fully featured Android tablet based on the latest A9 processor architecture. You can browse online, download apps via Google Play™, create documents with Google Apps™, take photos, record videos, read e-books... and work together with **Wordwall**.

Especially designed for use in schools, **Wordwall** turns your tablets into much more than just fancy web browsers, opening up a world of possibilities for whole class interaction.

We've thought of all the problems, so you don't have to: app deployment, device management, accessory packs and protective cases - we've got it sorted. All devices come with a two year warranty.

Ideal for 1:1 or classroom set deployment in schools, **Wordpad 7** is available at a fraction of the price of competing solutions.

Manage devices with a few clicks.

With iPads and other Android tablet solutions, you have to rely on third party solutions to deploy apps and network settings. **Wordpad 7** comes with a solution built in. Just login to our online management site to deploy apps and settings to tablets wirelessly.

You can assign different devices to class sets and control which apps are available on a lesson-by-lesson basis. Our customized settings app stops students messing around with the configuration you've chosen to deploy. Remove the web browser, leave only the apps you want students to use - and keep your lesson on task.

Google's Android makes life easy

There's no easier way to manage email, share calendars, collaborate on documents, spreadsheets and slideshows than with Google Apps for Education - what's more it's free to schools and colleges.

There are thousands of educational apps available from the Google Play store - something for every subject. The **Wordpad 7** also supports Adobe Flash - so you can continue to use the legacy resources on which you rely.

Get curriculum content with Wordwall

Our online community has tons of ready-made resources covering the whole curriculum, that you can search for within **Wordwall's** community tab.

Each school term, nearly 5,000 activities are added by teachers like you. Join and contribute!

Now for iPad™ and Android™

Wordwall™

The most fun you can have in a classroom. Guaranteed.

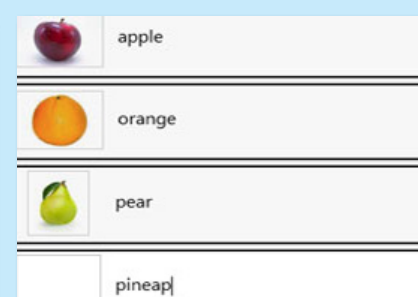

Make interactive activities and get everyone involved

It's as easy as 1-2-3

1 - Pick a template...

2 - Enter content...

3 - Play the game!

...or have ready-made content at your fingertips from the Wordwall community.

Activity templates include: Bar Graph, Brainstorm, Category Brainstorm, Circle Time, Checklist, Connecting Tiles, Conveyor Belt, Crossword, Flip Tiles, Group Sort, Image Reveal, Labelled Diagram, Match-Up, Matching Pairs, Maths Tiles, Moveable Tiles, News Feed, Numbered Tiles, Quiz, Random Wheel, Rank Order, Rating Scale, Seating Plan, Sentence Maker, Simple Tiles, Sketch Tiles, Spider Diagram, Stacked Tiles, Tally Table, Tiles In A Row, Word Maker, Wordsearch and more.

Choose your **Wordpad**.

...every student answers...

...see it on the teacher's screen.

Or bring your own device with Wordwall's RespondAnywhere

Get more from your iPads or your ICT suite with Wordwall. Finding apps can be a chore, but with Wordwall you can create engaging content for lesson and involve the whole class.

Students can interact with **Wordwall** via any web-enabled device – PCs, Macs, iPads, tablets or via their own mobile phones. Use it with your own HTML5 compatible hardware and simply pay an annual subscription to use it across your school. Or buy our hardware and there's no subscription necessary - your choice!

Wordpad activities

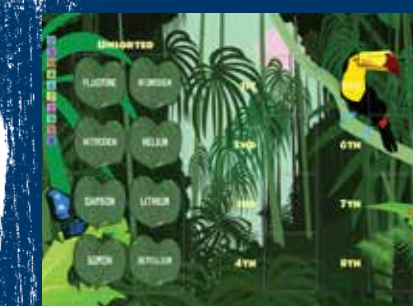

Joypad

A great 32 player computer game for the classroom. Students navigate their player chip around the screen answering questions, against the clock, against the class. You get a point for each question you answer correctly. Will you make it onto the leaderboard? It's a fantastic plenary, because you can use the assessment data to demonstrate progress and plan your next lesson.

Text Brainstorm

Contribute an idea and slap it on the virtual post-it board. With the brainstorm game, every student has a voice, even those who wouldn't normally speak out. Starting a lesson with a brainstorm really gets students thinking about their own ideas and is a great basis for classroom discussion.

Rating Scale

Do you agree or disagree? Evaluating ideas is just as important as coming up with them in the first place. You can either use teacher-provided keywords or convert the information from a text brainstorm activity. When applied to their own ideas, it encourages students to think more deeply about their beliefs or conceptions. Use it before and after paired discussion to show how opinions have changed – then ask them why!

Quiz

Fastest finger first or a proper assessment? You do a quick fire game show style activity where students buzz in to answer questions – a fun revision activity. Or you can conduct a real test under timed conditions, where students progress through the test at their own pace. After the test, students can immediately review their results individually.*

Sketch tiles*

A great tool that enables students to express themselves visually. It's like Pictionary en masse. Students can draw an image on their own tablet, using the pen tools. Their artistic endeavour can then be shared with the whole class.

*available only on the Wordpad 7
